

# CSI கிறிஸ்து ஆலயம் — கல்விடைக்குறிச்சி

CSI CHRIST CHURCH KALLIDAIKURICHI

## Website Architecture, Codebase, Editing & Deployment Manual

Author: Website Engineering Team | Stack: Next.js 14, React 18, TypeScript, Tailwind CSS | Published: September 2026

### 1. Website Overview & Core Architecture

This website is a modern, responsive web application engineered specifically for **CSI Christ Church Kallidaikurichi**. It provides church information, service schedule management, online sermon streaming, ministry highlights, photo gallery with lightbox, prayer request dispatching, and branch churches (sub-churches) directory.

#### ⚡ Core Technologies

- **Framework:** Next.js 14.2 (App Router architecture)
- **Language:** TypeScript 5.5 (Strict type checking)
- **Styling:** Tailwind CSS 3.4 (Custom church colors)
- **Icons:** Lucide React (featherweight SVG icons)
- **Fonts:** Google Noto Sans Tamil & Inter

#### 🌐 Key Website Features

- **Two-Tier Header:** Main header + high-contrast sub-header
- **Adaptive Worship Scheduler:** 1st–5th Sunday dynamic detection
- **YouTube Integration:** Latest, Live Stream, and Popular videos
- **Photo Gallery:** 21 optimized photos with interactive lightbox
- **Prayer Request:** Auto-email to official inbox + WhatsApp fallback

### 2. The Central Control Panel: `data/church.ts`

To ensure non-programmers can easily update this website, **90% of all website content is centralized in a single file:**

d:📁or website `amil-church-website` `amil-church\data\church.ts`

#### 💡 Golden Rule of Editing:

When you need to change phone numbers, email, WhatsApp, pastor details, service timings, sermon videos, sub-churches, or gallery photos, **you only need to edit** `data/church.ts` ! You do not need to touch HTML or complex React code.

| Variable Name                                               | Data Managed                                                                                       | Where it Appears on Website                                              |
|-------------------------------------------------------------|----------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| <code>churchInfo</code>                                     | Name, address, phone, email, WhatsApp, pastor name, catechist name, maps URL, social links         | Header, Footer, About Page, Contact Page, Prayer confirmation modal      |
| <code>serviceTimes</code>                                   | Sunday Service, Tuesday Healing Service, Friday Bible Study, Fasting Prayer                        | Homepage "Oraman Times" section, About Page, Footer                      |
| <code>sermons</code>                                        | YouTube URLs, video titles, thumbnail images, dates, video types (latest, live, popular)           | Homepage Sermons section, <code>/sermons</code> page                     |
| <code>subChurches</code>                                    | 4 branch churches: name, location, address, timings, pastor, image, description                    | <code>/sub-churches</code> page, Navigation menu                         |
| <code>pastorsHistory</code>                                 | Chief Pastor, Catechist, and past pastors (photo, name, year of service)                           | History section on <code>/about#history</code> and <code>/history</code> |
| <code>galleryCategories</code> & <code>galleryImages</code> | Categories ("பண்டிகைகள் & நிகழ்வுகள்", "சிறுவர் ஊழியம்", "ஆலயம் & ஆராதனை"), photo paths, alt texts | <code>/gallery</code> page (Category filter pills and lightbox)          |
| <code>events</code> & <code>ministries</code>               | Upcoming church events, youth, men, women, Sunday school, and choir details                        | <code>/events</code> and <code>/ministries</code> pages                  |

### 3. Complete Image Path Guide (Start to End)

In Next.js, all images served to the browser must reside in the `public/` directory. When referencing an image in code, the path begins with `/images/...` (the word `public` is omitted in the code URL).

Directory Map: `public/images/`

```

#### Image Specifications & Best Practices

| Image Usage                        | Recommended File Format                         | Ideal Dimensions            | Max File Size |
|------------------------------------|-------------------------------------------------|-----------------------------|---------------|
| Church Logo                        | <code>.png</code> (with transparent background) | 512 x 512 px                | < 200 KB      |
| Hero / Sanctuary Banners           | <code>.jpg</code> or <code>.webp</code>         | 1920 x 1080 px (16:9)       | < 500 KB      |
| Chief Pastor / Catechist Portraits | <code>.png</code> or <code>.jpg</code>          | 800 x 800 px (Square / 1:1) | < 250 KB      |
| Gallery Photos                     | <code>.jpg</code>                               | Max 1920 px on longest side | < 450 KB      |
| Sub-Churches Photos                | <code>.jpg</code>                               | 1280 x 720 px               | < 350 KB      |

⚠️ **Critical Note Regarding Apple iPhone HEIC & Camera DNG Files:**

Web browsers (Google Chrome, Safari on Windows/Android, Edge, Firefox) **cannot display .HEIC or .DNG files natively**. Always convert images to `.jpg` or `.png` before putting them into `public/images/`. All 6 original HEIC photos and DNG photos from your `Used` folder have already been pre-converted and optimized into `public/images/gallery/`.

## 4. Step-by-Step Guide: How to Edit Content

### A. Updating Pastor or Catechist Details

1. To replace the Chief Pastor's photo: Copy your new photo to `public/images/chief-pastor.png` (overwriting the file).
2. To replace the Catechist's photo: Copy your new photo to `public/images/catechist.png`.
3. Open `data/church.ts` and update the text:

```
pastorName: "Rev. P. Muthuraj M.Sc., B.D., P. G.Dip. Th.",  
pastorTitle: "தலைமை போதகர் (Chief Pastor & Pastorate Chairman)",  
catechistName: "திரு. T. ரெபின் ஆஸ்டின் B.A., B.D.",  
catechistTitle: "சபை ஊழியர் (Catechist)",
```

### B. Updating Sunday Worship Schedule & Oraman Times

The worship schedule logic in `components/ServiceTimes.tsx` automatically determines the current week of the month (1st through 5th week):

- **1st Sunday:** திருவிருந்து ஆராதனை (Holy Communion Service) — 09:00 to 11:30 AM
- **2nd Sunday:** வழக்கமான ஆராதனை (Regular Service) — 09:00 to 11:30 AM
- **3rd Sunday:** திருவிருந்து ஆராதனை (ஆங்கிலிக்கன் முறைமை - Anglican Order) — 09:00 to 11:30 AM
- **4th Sunday:** ஆராதனை (Worship Service) + **4வது வார உபவாச ஜெபம் (Fasting Prayer)**
- **5th Sunday (when present):** வழக்கமான ஆராதனை (Regular Service) — 09:00 to 11:30 AM
- **Every Tuesday:** சுகமளிக்கும் ஆராதனை (Healing Service) — 07:00 to 08:00 PM
- **Every Friday:** வேதாகம ஆராய்ச்சி (Bible Study) — 07:00 to 08:00 PM

### C. Updating Latest Sermons & YouTube Videos

Open `data/church.ts` and find the `sermons` array. Each box corresponds to a video on the homepage:

```
export const sermons = [
  {
    id: "latest-video",
    title: "30.08.2026 - SUNDAY SERVICE",    <-- Change Video Title
    youtubeUrl: "https://www.youtube.com/watch?v=YOUR_VIDEO_ID",
    thumbnail: "https://i1.ytimg.com/vi/YOUR_VIDEO_ID/hqdefault.jpg",
    type: "latest",
  },
  {
    id: "live-stream",
    title: "Sunday Service Live Stream | நேரலை ஆராதனை",
    youtubeUrl: "https://www.youtube.com/channel/UC4aaLgFQ9gWtYFuT7oHehdg/live",
    type: "live",
  },
  {
    id: "popular-video",
    title: "21வது ஸ்தோத்திரப் பண்டிகை | Kallidaikurichi Pastorate",
    youtubeUrl: "https://www.youtube.com/watch?v=POPULAR_VIDEO_ID",
    thumbnail: "https://i3.ytimg.com/vi/POPULAR_VIDEO_ID/hqdefault.jpg",
    type: "popular",
  }
];
```

## D. Adding Past Pastors to History

When you are ready to upload past pastors' photos:

1. Place their portrait photo in `public/images/pastors/past-pastor-1.jpg`.
2. Open `data/church.ts`, scroll to `pastorsHistory`, and update the entry:

```
{
  id: "past-pastor-1",
  name: "போதகர் பெயர் (Pastor Name)",
  role: "முந்தைய போதகர்",
  year: "2016 - 2020",
  image: "/images/pastors/past-pastor-1.jpg",
  isCurrent: false,
}
```

3. The history section will automatically display the card showing **only image, name, and year of working**.

## 5. Terminal Setup & Development Workflow

### Running Locally for Development

Open your terminal (PowerShell / CMD / VS Code terminal) and navigate to the project directory:

```
d:
cd "d:\or website      amil-church-website      amil-church"

# Start development server for computer only:
npm run dev

# Start development server accessible on BOTH Computer AND Mobile Phone:
npm run dev -- -H 0.0.0.0
```

#### On Your Computer:

Open your web browser and navigate to:

<http://localhost:3000>

#### On Your Mobile Phone:

Connect phone to the same Wi-Fi network and open:

<http://192.168.1.4:3000>

### Testing Production Build Locally

Before publishing or deploying, always verify that your TypeScript and static generation build cleanly:

```
# Check for TypeScript errors:
npx tsc --noEmit

# Run full Next.js production build:
npm run build
```

## 6. Publishing Live to the World (Vercel & GitHub)

To make your website available to anyone in the world 24/7 without needing your personal computer to stay on:

### Step 1: Push Code to GitHub (Backup & Version Control)

```
# 1. Create a free repository on https://github.com named "csi-christ-church-website"
# 2. In your terminal, link and push your code:
git remote add origin https://github.com/YOUR_USERNAME/csi-christ-church-website.git
git push -u origin main
```

### Step 2: Deploy to Vercel (100% Free Hosting with HTTPS)

1. Create a free account at [vercel.com](https://vercel.com) using your GitHub account.
2. Click **"Add New..."** → **"Project"**.
3. Select your `csi-christ-church-website` repository and click **"Import"**.

4. Click "**Deploy**" without modifying any settings.

5. Within 60 seconds, your site is live worldwide at: <https://csi-christ-church-website.vercel.app> !

### Step 3: Continuous Automatic Deployment (CI/CD)

Whenever you make updates in the future (e.g., adding a new gallery photo or changing sermon links):

```
# Stage all changed files:
git add .

# Save with a message:
git commit -m "Updated sermon video and service announcements"

# Push to GitHub:
git push
```

**Vercel automatically detects the push and re-deploys your live website in under 60 seconds!**

#### **Adding a Custom Domain (e.g., csichristchurchkallidai.org):**

In your Vercel Dashboard → Go to **Settings** → **Domains** → Enter your domain name and point the DNS records (A Record: [76.76.21.21](#) or CNAME: [cname.vercel-dns.com](#)). Vercel provides automatic, free SSL security certificates forever.

## 7. Troubleshooting & Frequently Asked Questions

| Issue Encountered             | Probable Cause                                                  | Immediate Solution                                                                                                                           |
|-------------------------------|-----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| Port 3000 already in use      | Another background Node instance is running.                    | Run <code>Get-Process node   Stop-Process -Force</code> in PowerShell, then re-run <code>npm run dev</code> .                                |
| New photo not appearing       | Filename mismatch or missing from <code>data/church.ts</code> . | Check exact casing and extension (e.g. <code>.jpg</code> vs <code>.jpeg</code> ) and ensure the file exists in <code>public/images/</code> . |
| Mobile phone cannot load site | Computer IP changed or phone on different Wi-Fi.                | Check your PC's IP using <code>ipconfig</code> and ensure you ran <code>npm run dev -- -H 0.0.0.0</code> .                                   |
| Prayer request email inquiry  | Official recipient address.                                     | All prayer submissions are directed to <code>csichristchruchofficial@gmail.com</code> and open pre-filled mail clients.                      |
